

**EASY. FAST.  
FLEXIBLE.**

The new generation of SCM IT

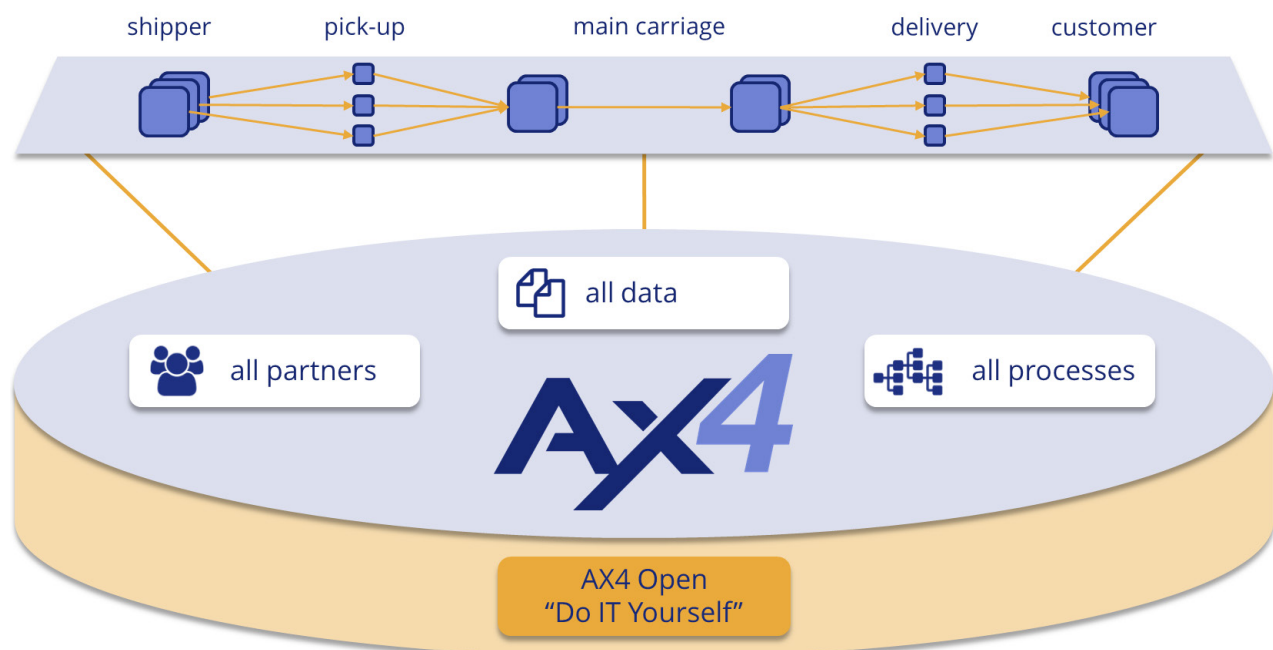

FLEXIBLE  
STANDARDS

AXIT is a specialist for cloud-based IT solutions for the management of supply chains. With AX4 the company runs the industry's leading logistics platform used by more than 200,000 users from trade and industry as well as at logistics providers for management of their supply chain.

Founded in 1999, AXIT meanwhile employs a staff of over 150. Many well-known companies can be found among the customers, including BASF, Kuraray, Audi, Ford, Siemens, dm-drogerie markt, Obi, British American Tobacco from industry and retail sector as well as more than 2,000 carriers and logistic service providers such as DB Schenker, DHL, Panalpina, Rhenus, Arcese and CargoLine.

Siemens Postal, Parcel & Airport Logistics GmbH (SPPAL) is the owner of AXIT and a leading provider of innovative products and solutions in mail and parcel logistics and automation as well as in airport logistics with baggage and cargo handling. The company has an installed base in more than 60 countries worldwide.

*The Logistics Platform AX4*

Upholding the motto "Supply Chain Management at the Push of a Button" more than one million shipment data is exchanged via the cloud-based logistics platform AX4 every day. Thus AX4 is the most-used logistics platform for the management of cross-company logistics processes in Europe. With flexible, consistent workflows AX4 informationally maps the physical flow of goods and has already been awarded several innovation awards.

*"The cloud-based logistics platform AX4 allows us to continuously optimize the procurement of spare parts and to easily integrate all necessary partners."*

Reiner Boltersdorf  
Supervisor European Inbound Operations (FCSD)  
Ford-Werke GmbH

**INTEGRATION**  
fast and flexible  
connection of new partners

**STANDARDIZATION**  
wide process knowledge  
gained in over 2,500 projects

*"The logistics IT platform was groundbreaking for us since we were able to create standardized communications. As a conclusion we can say: all goals reached."*

Maximilian Kummerer  
Director Supply Chain  
Leder & Schuh AG

*"AX4's big advantages are its high flexibility, availability and the ability to quickly adapt to changing requirements and conditions."*

Jens Nöldner  
CEO  
DB Cargo Logistics GmbH

**FLEXIBILITY**  
high degree of freedom  
of design for customers

**COLLABORATION**  
easy access  
to a large network

*"Collaboration means to us, to share transport information with all involved participants via one central platform. This is necessary to cooperate smoothly."*

Ivonne Stange  
Logistics Manager Europe  
Almatris GmbH

Especially in logistics, in an industry which is constantly moving and changing, flexible standards are necessary. In this world there can be no standard process which is valid for everyone. Processes change. IT must be flexible and versatile enough to be able to create change processes quickly, easily and with lean budgets.

Flexible standard means that with a single IT module tool box (= standard) various solutions can be created (= flexible). As in the example of automobile production it is a single production line through which the cars pass – but the result of production is a variety of models. The production process is standardized but the result reflects the customer's individual requirement up to the smallest detail. This is what we understand by "flexible standard".

Integration	Web-Account	EDI	Shipment Upload	Web Service	Mobile Devices		
Roles	Shipper	Logistics Provider	Carrier	Consignee	Observer	Individual Roles	
Order Management	Order Transmission & Confirmation	Call-off Transmission	Delivery Note Creation	Overviews & Searches			
Shipment Management	Shipment Transmission	Consolidation & Dispatch	Manifest Creation	Routing & Barcode Label	Overviews & Searches		
Tracking	Transmission of Tracking Data from LSP	Transmission of Tracking Data to Shipper	Overviews & Searches				
Additional Functions	Print Documents	Electronic Data Folder	SCEM	Master Data	Reports	Billing	Time-Slot Management
AX4 Open	Administration / Management	Configuration Workflow	Configuration User Interface	Configuration Documents	Scripting Language	Integration Tools	Test & Migration

*The AX4 Module Box*

AX4 Open is the configuration tool for a flexible and agile set up and adaption of AX4 solutions. According to the motto “Do IT Yourself” customers can create and manage their individual AX4 solution with this innovative tool. The advantages are obvious: Independently from the provider adaptations can be done at any time or best practice solutions can be multiplied at the push of a button.

AX4 Open – “Do IT Yourself”
